Test Cases

Test Case 1: Add Item

Inputs:

itembutton: on
itemquantity = "number"
itemconfirmbutton: yes
confirmeditem: true

Expected Output: item added to list

Actual Output: ?

Pass/Fail Criterion: Actual Output == Expected Output

Test Case 2: Admin Approve Item

Inputs:

itembutton: on
itemapprovebutton: yes
itemapproved: true

Expected Output: "(item) approved"/ item added to list

Actual Output: ?

Pass/Fail Criterion: Actual Output == Expected Output

Test Case 3: Admin Reject Item

Inputs:

itembutton: on
itemapprovebutton: no
itemapproved: false

Expected Output: "(item) rejected"

Actual Output: ?

Pass/Fail Criterion: Actual Output == Expected Output

Test Case 4: Create Family

Inputs:

createfamilybutton: on

Expected Output: New family is created

Actual Output: ?

Pass/Fail Criterion: Actual Output == Expected Output

Test Case 5: Add Family Members

Inputs:

addmemberbutton: on

itemlimit: quantity entered (optional)

Expected Output: Family member added (item limit optional)

Actual Output: ?

Pass/Fail Criterion: Actual Output == Expected Output

Test Case 6: Create List

Inputs:

createlistbutton: on

Expected Output: List is created

Actual Output: ?

Pass/Fail Criterion: Actual Output == Expected Output

Test Case 7: Delete List

Inputs:

listOptions: on

delete: on

Expected Output: List is deleted

Actual Output: ?

Pass/Fail Criterion: Actual Output == Expected Output

Test Case 8: Suggest Item

Inputs:

suggestItem: on
inputBox = "item"
submit: on

Expected Output: Suggested item/inputBox is sent to Admin

Actual Output: ?

Pass/Fail Criterion: Actual Output == Expected Output

Test Case 9: Close List

Inputs:

listOptions: on
closeList: on

Expected Output: List is closed

Actual Output: ?

Pass/Fail Criterion: Actual Output == Expected Output

Test Case 10: Hide List

Inputs:

listOptions: on
hideList: on

Expected Output: List is hidden

Actual Output: ?

Pass/Fail Criterion: Actual Output == Expected Output

Test Case 11: Open List

Inputs:

listOptions: on
openList: on

Expected Output: List is opened

Actual Output: ?

Pass/Fail Criterion: Actual Output == Expected Output

Test Case 12: Notifications

Inputs:

notificationbutton: on
notificationoption: “item added/removed”, “list created”, “item approved/rejected”
optionselect: on
shownotification = true

or

optionselect: off
shownotification = false

Expected Output: Notifications are turned on or off (depending on selection)

Actual Output: ?

Pass/Fail Criterion: Actual Output == Expected Output
