7. Delete list (optional)
8. Suggest item (non admin)
9. Admin closes list
10. Admin opens list
11. Being able to choose what notifications a user receives

User Stories:

Create Family
User hits button called "create family"
New family/group is created

Add family members
User can invite other people with accounts to join the family/group
User also has an option to place a limit on how many items other members can add to the list
User then confirms the new family member(s)

Create list
User hits button called "create list"
Now all users in the family can add / suggest items to be added to the list

Add Item
User types in item to be selected or browses through categories
User clicks on item (Change quantity if wanted/needed)
Presses "confirm"
Item is added to the users "wish" list

Admin Approve Items
Item pops up for approval/rejection
Admin selects approval
Item is added to the list

Admin Reject Item
Item pops up for approval/rejection
Admin selects reject
Item is not added to the list

Delete List
Admin selects "list options" icon.
Admin selects "delete".
List is deleted.

Suggest item
User chooses "suggest item" icon.
User enters item into text box.
User selects "submit" icon.
Item is submitted to Admin for review

Admin Close List
Admin selects "list options" icon.
Admin selects "close list".
List is closed from outside suggestions.

Admin Hide List
Admin selects "list options" icon.
Admin selects "Hide list".
List is no longer visible to Users.

Admin Hide Item
Admin selects "item options" icon.
Admin selects "hide item"
Item is no longer visible to Users.

Notifications
User selects "Notifications" icon (bell graphic)
List of notification options appear (Item added/removed, list created, item approved/rejected)
User chooses which ones to toggle on/off

Admin Opens List
Admin selects "Lists" icon
Admin selects desired list by name
List appears along with its items
